POWER DISTRIBUTION PANELS (PDP)

RUBBER SERIES MODEL 610-5002-9900

PDP RUBBER SERIES

The new UEC model 610-5002-9900 power distribution panel (PDP) provides safe and reliable power distribution. The PDP has a military approved Class L 100-amp, 208-volt, 3-phase inlet with two military approved Class L 60-amp, 208-volt, and 3-phase outlet. The three-phase power is also broken into (6) 120-volt, 1-phase, 20 amp GFCI duplex receptacles, protected with circuit-breakers each with a durable spring return cover and power indication light. Every circuit has an amber power indication light for easy user interface.

The electrical components are housed in a tough high impact, weather resistant, non-corrosive rubber enclosure. The PDPs are also stackable and can be fully operational in the stacked position. These PDPs are also available with a variety of military and commercial inlets and power outlets to meet your specific needs. Larger dual handle and skid models are also available.

Features and added benefits listed below:

Body Construction:

Lightweight compact design (100 amp unit) 36 lbs.
Tough high impact, weather resistant, non-corrosive rubber enclosure.
Dimensions for 100 amp models are 13" square.
Large external carry handle..

Electrical Features:

3 and 1 phase power distribution in one box.
Pilot light indicates if power is on or off for easy user interface.
Available with a variety of military and commercial inlets and power outlets .
Durable spring return receptacle, breaker and meter covers.
